Monthly Investment Report – November 2025

Investments at a glance (as of 11/30/2025):

- The fed lowered rates by 25 basis points in both September and October, and again in December, as expected. The increase in interest earnings compared to the prior year is due to the increased balance in the portfolio.
- The portfolio outperformed all of the yield benchmarks in October, but as mentioned the last few months, the year over year change benchmark is lagging due to the \$85m of negotiable CD's that matured. All 4 CD's that matured during last fiscal year had yields ranging from 5.35% to 5.61. Moving forward into 2026, yields are expected to continue trending downward.
- We continue to maintain the vast majority of the portfolio in pooled funds until we may get more solid cash flow projections for project spending.
